

THERMAL DETECTION

BODY TEMPERATURE DETECTION SYSTEM

ACCURATE, FAST AND RELIABLE MASS TEMPERATURE DETECTION SYSTEM

FACIAL TEMPERATURE MEASUREMENT

HIGH ACCURACY TO 0.3°C

UP TO 40 PEOPLE MEASURED SIMULTANEOUSLY

<30ms RESPONSE TIME

KEY FEATURES

- Fast temperature measurement
- High temperature accuracy
- Long distance, non-contact detection
- Only measures facial temperature
- Dual Spectrum Technology (overlay of temperature on live view)
- Mobile App available
- Licence Free software
- Environment calibration
- A complete thermal detection solution

DESCRIPTION

This Body Temperature Detection System can accurately detect facial temperatures of up to 40 people at once with an accuracy of $\pm 0.3^{\circ}\text{C}$, this is ideal for monitoring body temperatures at entrances to events, transport hubs and buildings.

This system comprises of the camera, an NVR, a temperature calibrating device as well as all the necessary brackets for installation.

Using advanced facial detection, the system uses the face temperature for a more accurate measurement. This also stops any false readings, such as a person carrying a hot drink. With astonishingly fast response time and being able to measure up to 40 people at once, the system will reduce the need for single file detection, aiding in the speed of people passing through the detection area.
